Dear President, dear Raffaele,

Being in Paris, I have just heard about the dramatic earthquake that happened last night in the *Abruzzi Region*.

In the name of all the architects of the world, I want to share your sadness and worries in this situation of tragedy that Italy is confronted with.

The International Union of Architects would like to bring any help to the Italian architects and the devastated population. I invite you to let me know your wishes on this specific offer.

With my deepest sympathy and very best regards.

Louise COX
President
