

CONTESTED SPACE AND RESPONSIVE ARCHITECTURE Making and Speculating

Second International
Summer School
in Supino, Lazio, Italy
19-24th August 2013

This summerschool will investigate the role that the small town of Supino, can or cannot play within the global context, especially as a result of the local pressures it faces due to the proximity to Rome. Hence the participants in the workshop will have the option of projecting their intellectual discussions and design investigations to include as well the city of Rome, and as such look at possible future scenarios for the Rome/Supino region in, for instance, 2050 AD.

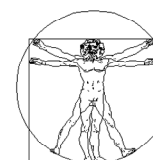

Fantastic architectural setting just 40 minutes from Rome.. A new unique experience with collective activities. Total fees 400 Euros with accommodation included

The event will be hosted by:
Luisa Morgantini, formerly the Vice-President of the European Parliament, and citizen of Supino
Alessandro Foglietta, the Mayor of Supino
Sistema Natura
